1 September 2026

Executive Summary — DELIVERY130

The 129 artists of the first NBS submission, measured across 31 quarters from Q1 2019 to Q3 2026.

Gross streaming revenue

\$469,833,610 (¥704,750,415,210) across the whole period.

Q3 2026 is an **INCOMPLETE quarter**. The revenue-bearing series all end 2026-08-11, 42 of the quarter's 92 days (45.7% coverage), and the quarter does not close until 2026-09-30. Its level-based components (Spotify listeners, Deezer fans) are billed for three full months regardless of how much of the quarter was observed, so it is booked at \$28,424,708, 6.05% of the headline, while being under half observed.

Restricted to the 30 COMPLETE quarters the figure is **\$441,408,902**. Both are published because a total that silently mixes a part-quarter with full ones is comparable to neither.

Year	Gross streaming revenue	Quarters
2019	\$11,358,002	4
2020	\$19,022,130	4
2021	\$32,540,083	4
2022	\$58,603,840	4
2023	\$83,815,500	4
2024	\$89,917,031	4
2025	\$93,887,637	4
2026	\$80,689,387	3

The series runs from \$1,872,809 in Q1 2019 to \$27,542,908 in Q2 2026. Q3 2026 is an **incomplete quarter** — the revenue-bearing series end 2026-08-11 (42 of 92 days, 45.7% coverage) and it closes 2026-09-30 — and is excluded from every growth calculation.

Growth

Growth is **not** uniform across the period and must not be quoted as a single rate. On a trailing-twelve-month basis it ran above 100% to 2022 as provider coverage expanded, fell to about 4% through 2025 as the market matured, and is re-accelerating into 2026.

The forward projection is fitted on the **last 12 complete quarters** and gives **8.192% a year**. Fitting the whole series instead would give 42.262% and project a figure roughly double the last observed quarter; that is a base effect, not a forecast. The full sensitivity across windows is published with the projection.

Quarter	Projected	95% lower	95% upper
Q4 2026	\$26,641,062	\$25,114,348	\$28,235,362
Q1 2027	\$26,224,069	\$24,721,252	\$27,793,415

Quarter	Projected	95% lower	95% upper
Q2 2027	\$28,770,807	\$27,122,045	\$30,492,559
Q3 2027	\$28,976,807	\$27,316,239	\$30,710,887
Q4 2027	\$28,823,544	\$27,171,759	\$30,548,452
Q1 2028	\$28,372,390	\$26,746,460	\$30,070,300
Q2 2028	\$31,127,762	\$29,343,930	\$32,990,563
Q3 2028	\$31,350,637	\$29,554,033	\$33,226,776

Every projected figure is an estimate about quarters that have not happened.

What this package does not claim

- No track-level stream count is observed anywhere; every stream figure is an audience count multiplied by a documented coefficient.
- The domestic/export split exists for 23 of 31 quarters. The rest are blank.
- Employment is a national figure and is not attributable to these artists.
- Unit costs are assumptions; only the artist counts behind them are measured.
