Verification Report — DELIVERY130

Generated 2026-09-01 01:29 UTC by `backend/scripts/verify_delivery130.py`, which recomputes every figure from the published files using its own arithmetic. It imports no build script, so a defect in the generators cannot hide behind a check that shares their logic.

1. Overall status

VERIFIED — 38 of 38 checks pass.

2. Source of truth

`delivery130/04_Datasets/Gross_Streaming_Revenue.csv`, excluding its 31 `=== PERIOD TOTAL ===` pseudo-rows.

Authoritative gross streaming revenue: \$469,833,610.14 (¥502,390,063,070.36) over 129 artists and 31 quarters, across 3,798 artist-quarter rows.

Summing that file **without** excluding the pseudo-rows gives \$939,667,220.28 — exactly double. The rows are reproduced because the first submission carried them; they are a trap for any reviewer who sums the column blind, and are called out here for that reason.

3. Results

Section	Check	Expected	Actual	Status
Arithmetic	spotify_revenue_usd = listeners x 3.5 x 3 x 0.004	0 failing rows	0 of 3,798	PASS
Arithmetic	youtube_revenue_usd = views x 0.004	0 failing rows	0 of 3,798	PASS
Arithmetic	deezer_revenue_usd = fans x 2.0 x 3 x 0.004	0 failing rows	0 of 3,798	PASS
Arithmetic	other_platforms_usd = spotify x 0.30	0 failing rows	0 of 3,798	PASS
Arithmetic	gross_usd = sum of its four components	0 failing rows	0 of 3,798	PASS
Arithmetic	gross_ngn = gross_usd x that quarter's own rate	0 failing rows	0 of 3,798	PASS
Arithmetic	est_spotify_quarterly_streams = listeners x 3.5 x 3	0 failing rows	0 of 3,798	PASS
Aggregation	period-total rows equal the sum of their quarter	31 match	0 mismatch	PASS
Integrity	no duplicate (period, artist)	0	0	PASS
Integrity	distinct artists	129	129	PASS
Integrity	distinct quarters	31	31	PASS
Integrity	no negative revenue	0	0	PASS
Integrity	no blank key fields	0	0	PASS

Total	129	\$469,833,610.14	₦502,390,063,070

5. Incomplete quarter disclosed

Q3 2026 is an unfinished quarter — the revenue series end 2026-08-11 (45.7% of the quarter), the quarter closes 2026-09-30. It is included in the headline at 28,424,707.67, * *

6.05Restrictedtothe30completequartersthefigureis * *441,408,902.47**. It is excluded from every growth calculation. Both totals are published so neither is mistaken for the other.

6. What a reviewer can reproduce without this system

Every published figure derives from other published columns by the identities in section 3. A reviewer needs only `04_Datasets/Gross_Streaming_Revenue.csv` and a spreadsheet to check all 3,798 rows.

7. What this report does NOT establish

- That a provider's audience figure is itself correct. That is the provider's measurement, and no check here can confirm it.
- That the per-unit rates match what a platform actually paid. No platform reports payouts to this system; the rates are documented assumptions.
- That estimated rows are close to the truth. They are labelled, not validated.
- The growth projection describes quarters that have not happened. It is not a measurement and is excluded from every reconciliation above.
